

# Manfred Berger

---

## Education

Graduated from the University of Gothenburg, Sweden, in 1980 with a B.S. in Software Engineering.

## Personal Bio

Manfred Berger is a Software and Applications Engineer who has been working in the field of Motion and Position Measurement Systems for over 20 years. His first introduction to this field was with Selcom AB, the founding company of commercial 3D/2D motion analysis equipment, based in Gothenburg, Sweden.

In the mid 80's, Manfred became a part owner of Selspot AB and as a project leader developed one of the most sophisticated data acquisition and motion analysis software packages available at that time. In the late 80's, Manfred Berger was transferred to the US office to start and lead the technical support department for Selspot, Inc.

In 1990, Manfred was asked by Selcom AB and Qualisys AB to start his own company to represent both companies top-of-the-line motion analysis equipment. Innovision Systems, Inc. was started in 1990 and grew into a million dollar company. Knowledge, dedication, and quality service has been the foundation in which Innovision Systems was built on.

Manfred's area of expertise is in; motion and data analysis systems, data acquisition systems, real-time and embedded systems, device drivers and system programming.
